Specifications

Sample Images

Beautiful images

Excellent performance

12.2-megapixel CMOS Sensor and DIGIC III

Faster image processing and stunning photos with 14-bit A/D conversion.

Continuous 9.5fps Shooting

Fast, continuous bursts of up to 53 Large/Fine JPEG images.

Image Stabilizer (IS) Lens Support

Reduces blur caused by camera shake and extends handheld shooting threshold.

Live View Shooting

A new way to compose and shoot using the large LCD monitor.

EOS Integrated Cleaning System

Vastly decreases dust via a comprehensive and fully automatic cleaning system.

Precise 9-point Auto Focus

Great tracking of moving subjects and precise focusing in both vertical and horizontal formats.

Auto Lighting Optimizer

Rescues muddy, underexposed images with automatic brightening.

Superb handling

3.0-inch LCD Monitor

A bigger, brighter display for easier composing and viewing of photos.

Comfortable, Easy Operation

Intelligent and useful features for more intuitive operation and better photos.

Lightweight Body, SD Card Compatibility

Approx. 35g lighter than previous models and now with SD card support.

Comprehensive System Enhancements

Fast and easy system expansion with a wide range of quality Canon accessories.

Viewfinder with 0.87x Magnification

Bright, easy to view with important shooting information clearly displayed.
